I for one, cannot believe that the department of JUSTICE is even considering letting Micro\$oft off the hook so easily! This is the company that has lied and misled the courts at every turn! I am shocked! Shocked and appalled that a corporation can engage in such blatantly monopolistic behavior, and walk away with a comparative slap on the wrist. Having been involved with the personal computer industry essentially since its' inception, I have been witness to the most egregious violations, and would like justice to truly be done.
